Experience

2024-2025 : An intern at University of Nairobi Enterprise Services (UNES) -HealthIT

2021-2023: Worked as desktop application developer at Laxco inc Tech in partnership with kericho county

2022-2023: Worked with Ajira Digital Program as TOT.

2022-2024: Worked as a freelancer.

Projects

1. ***Supporting USAID HEALTHIT projects.***

   As an intern for a duration of 1 year, I have supported the programme in developing and implementing various systems that intended to fill in some gaps within the health sector. Some are listed below:

   - ***KenyaEMR*** - I have been part and parcel of developing KenyaEmr modules both custom and at global community level. This has mostly been on Frontend and also part of backend across a number of modules.

     Also i have deployed, trained and supported end users in number of counties within the selected facilities including Kabianga Health Center and Bomet Health Center

   - ***KMHFR*** - Having grassrooted knowledge on django python, I have been developing modules including GIS, Community Units and extending reports generated.
   - ***CPIMS*** - I have supported the development of CPIMS system by improving the user interface of the system
   - Technical assistant at kapkatet sub-county hospital.

2. *Laxco Point of sale & ERP*

As a junior software developer and passionate about desktop applications, I was able to develop a medium ERP for an average business to run its daily business.

3. *Kipchimichim Loan Management System*

Alongside other team members we were able to develop a loan management system to support the Kipchimchim group of business in giving access to loans and advanced payment.

4. *University Timetabling Software*

This is one of the softwares developed while studying. This project was solving a problem of wide and dynamic classes distribution in tertiary institutions which is a NP problem.

5. *Kabianga University- Research Portal (WIP)*

This system is currently under development. Its a system made to assist the university of Kabianga manage the research projects by keeping records of projects done , by who and the questions answered.
